6 x 2500 ml dispenser cartridge (SKU# 11574)
10 L canister (SKU# 11548)

* available as of December 2019

CHOOSE HAND CLEANSERS WITH NATURAL SCRUBBING AGENTS!

HERWE has always been an advocate of natural scrubbing agents in hand washing pastes.

Natural biodegradable scrubbing agents from corncobs has proven itself for almost 30 years in products such as **HERCULAN NATUR** and **HERCULAN FORTE NATUR**. Also, in our new formulations, we use only natural scrubbing agents. The latest: **corcbits®** (cork flour) in **HERCULAN INTENSO GEL**.

The level of contamination of the ocean ecosystem from cosmetic products containing plastic scrubbers is relatively low. Nevertheless, plastic scrubbing agents are dispensable from our point of view.

We donate a part of our profits from the sale of hand cleansers to an organization that really makes a difference: www.plasticbank.com
